SPARK! has been taking students from our inner city and preparing them for college since 1979. Its an amazing program that gives students that would normally not receive the time and attention the chance to dream about their future.

These students are able to attend classes based on the scholarships that are put together by donations. One scholarship allows a student to take preparation courses for college, extra tutoring as needed, covers college application fees, and covers travel for 2-3 college visits.

Please consider donating to help these students achieve their dreams!
